Ground team at National conference

Hypertension Screening

Entitlement work

Skill Training workshop

Home visits with communities

Hypertension intervention and community health activities

Community meetings

Workshop interaction

Learning with ground team

Documentation and advocacy

Creating solutions together with communities

ABOUT AID

AID has been with grassroots since many years, working with communities to support work across different interconnected areas of development like education, livelihoods, agriculture, natural resources, women's empowerment, social justice, relief and rehabilitation.

With organisations engaged in this and other areas of development, recognising that the challenges communities face are interconnected.

THE AID CHP

The AID Community Health Program (CHP) runs in villages across Chhattisgarh, Odisha, Bihar, Uttar Pradesh and Andhra Pradesh.

Works on community health strengthening, health literacy, basic clinical care, system accountability and access to healthcare.

Experience the diversity of challenges and face them together and create solutions together and
Let the community win!

WHAT SOME SWASTHYA SWASTHYA SAATHIS, TEAM LEAD AND COMMUNITY MEMEBERS HAVE SAY ABOUT THIS PROGRAM

“

We feel heard. CHP is there to listen to our problems and help us find a way forward. It has given us a sense that our health and our voices truly matter.

-Voice from the Community

“

This program has given me new experience and learning. I feel more confident in serving my community

-Swasthya Saathi

“

CHP has created a space where the ground team's experiences and ideas are valued. Working closely with the community has made our work more meaningful.

-Team Lead
