About Us

A hospital built by the people, for the people.

Established in 1983, Shaheed Hospital emerged from the collective struggle, solidarity and determination of mine workers in Dalli Rajhara, Chhattisgarh. Its origins lie in the community's demand for accessible and affordable healthcare, following the tragic death of Kusum Bai due to postpartum complications.

Rather than accepting the lack of accessible healthcare as inevitable, mine workers came together to build a hospital through collective contributions, voluntary labour and community participation. Shaheed Hospital thus became more than a healthcare institution—it became a symbol of people's ownership, collective responsibility, and the belief that quality healthcare is a fundamental right.
